Application No.: 10/068461

Docket No.: CXT-077

REMARKS**Administrative Matters**

Claims 1-18 were presented for examination. Claims 1-18 have been canceled and new claims 19-49 have been added. Claims 19, 35, and 47 are independent.

The Examiner considered the information disclosure statement and the supplemental information disclosure statement, filed on August 6, 2002, and May 22, 2003, respectively, except for references C17, C18, and C23, which the Examiner stated had no publication dates. Applicants submit herewith a second supplemental information disclosure statement including references C17, C18, and C23 and listing publication dates for those references. Applicants request that the Examiner now review references C17, C18, and C23. Applicants direct the Examiner's attention to U.S. Patent Application No. 10/288821, filed November 6, 2002.

Rejection of Claims 1-18 Under 35 U.S.C. §101

The Examiner provisionally rejected claims 1-18 as claiming the same invention as claims 1-18 of copending United States Patent Application No. 10/288,821 (hereafter the '821 application). Applicants respectfully traverse this rejection for the reasons set forth below.

Independent claims 1 and 10 of the '821 application were amended on November 6, 2002, in connection with prosecution of the '821 application. Applicants respectfully submit, therefore, that the rejection of claims 1-18 as unpatentable over the previously pending version of claims presented in the '821 application is mooted since claims 1 and 10 of the '821 patent have been amended.

Rejection of Claims 1-6, 9-14, 17 and 18 under 35 U.S.C. §102(e)

The Examiner rejected claims 1-6, 9-14, 17, and 18 as anticipated by United States Patent No. 6,088,515 to Muir et al., hereafter "Muir." For the reasons set forth below, Applicants respectfully traverse this rejection.

Claims 1-18 have been canceled, mooted the rejection. New claims 19-49 define patentably over Muir because Muir fails to teach or disclose a first virtual channel receiving

window attribute data. The Examiner states that Muir discloses a first virtual channel because Muir discusses a client agent. Muir's discussion of a client agent, however, does not teach or disclose a virtual channel receiving window attribute data, as recited by new independent claims 19, 35, and 47.
